

How to play :

Secret code

when your playing Secret code

You will see lines to put your

Words of the Businesses on. There will be one word under each line because when you start you will need to look at the word that is under the line then you need to look under the word code. There well be all of the ABC there. They will have one line across the word for example A-B B-A that means that A is not A its B and B is not B it's A so that's a little bit like opposite and that's how we play Secret Code.
